STAT NOTE TO: [REDACTED]

SUBJECT: General Faurer's Letter on the  
Indications and Warning Seminar

STAT 1. I called [REDACTED]-the DIA action man--  
concerning the agenda item tagged for the ICS to  
address. That item is "Increased Releasability of  
STAT the US Intelligence Information to NATO/NORAD."

2. [REDACTED] said that this was still an open  
item which he hoped would be handled by the ICS, but  
which he had not formally pinned down. The topic  
was left over from the April conference and identi-  
fied as one to be addressed later. [REDACTED]  
said his recollection was that General Wilson had  
indicated that he could take it on. STAT

3. I suggest that you raise this with General  
Wilson, and perhaps it could be kicked around at  
tomorrow morning's staff meeting. My own view is  
that--in an indication and warning context--notifica-  
tion of NATO and NORAD is pretty much exclusively  
a Pentagon action. Even on the broader issue of  
providing intelligence support to NATO/NORAD, DIA  
is the action component, although USIB has cogni-  
zance on the security angle. But I would not expect  
to have the broader problem addressed at an indica-  
tions and warning seminar. In any event, I think we  
should seek General Wilson's guidance on this.
